EVENTS & ENTERTAINMENT SPECIALISTS

ABOUT US

We offer a turn-key solution from designing the theme and concept, planning the logistics, appointing the supply chain and co-ordinating the technical aspects before actually launching the event. One quote, one invoice and one contact person working hand in hand with you, is the recipe for a smooth running, seamless and impactful event. The hands on approach of both the owners and staff ensure that all events are met with the utmost importance, no matter how big or small. We view event management not as a task, but as a skill developed and perfected over years of experience. 88 Events has at least 10 years events and hospitality experience within the industry. We are continuously searching for new and innovative event ideas and will go above and beyond when it comes to executing your ideas and ensuring that your event is of unrivalled stature.

Outstanding events and entertainment expertise coupled with extensive industry knowledge makes 88 Events the ideal choice for your events management company. The team's experience ranges from small scale public events, indoor or outdoor corporate events, activations and promos, large scale events & road shows. Long standing relationships, nurtured across the growth of the business gives us some negotiation leniency with suppliers, an advantage we share with our clients.

Additional services include hosts/ hostesses, corporate branding in the means of gifting and clothing as well as a host of localised event support services.
